## DETAILED ACTION

This communication is responsive to amendment filed on June 23, 2005.

### *Allowable Subject Matter*

1. Claims 1-27 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - a. Claims 1-26 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an automatic method and apparatus of linearizing a color printing system using measurements made with an optical sensor that is onboard the system, for forming images on plural printing media comprising the means for or steps of referring to a single calibration of the sensor, used in common for substantially all the plural media wherein the single calibration is with respect to exclusively a single one of the plural media; using the sensor to colorimetrically linearize the system for printing with each of plural colorants on any one medium, of the plural media.
  - b. Claim 27 is allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an automatic method of calibrating an optical sensor and using the sensor to linearize a color printing system that forms images on plural printing media comprising the steps of deriving a single sensor calibration from ideal properties of color inks, without making any optical measurement using the sensor; referring to the derived single

calibration, used in common for substantially all the plural media; using the sensor as calibrated by the single common calibration to colorimetrically linearize the system for printing with each of plural colorants on any one medium, of the plural media.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Sanger et al (US Patent No. 5,323,179) discloses a method of calibrating a multi-channel printer using test patterns.
